theme kde
How do I theme KDE 4?
Question: How do I theme KDE 4? Is there a difference between Plasmoid and Widget-theme?
Answer: There are 2 possibilities how to change your desktop appearance. Firstly there are plasma themes. They only theme plasmoids and the panel. New plasma themes can be downloaded by using the "New Theme" button directly from the "Desktop Settings" dialogue or can be downloaded from [url=http://www.kde-look.org/][/url]. If you would like to create your own plasma theme, follow this link for information on how to get started.

The Apache Software Foundation

Community-led development since 1999.

OPEN.

THE APACHE SOFTWARE FOUNDATION provides support for the Apache Community of open-source software projects, which provide software products for the public good.

INNOVATION.

THE APACHE PROJECTS ARE DEFINED by collaborative consensus based processes, an open, pragmatic software license and a desire to create high quality software that leads the way in its field.

COMMUNITY.

WE CONSIDER OURSELVES not simply a group of projects sharing a server, but rather a community of developers and users.

APACHE PROJECTS

The all-volunteer ASF develops, stewards, and incubates more than 350 Open Source projects and initiatives that cover a wide range of technologies. From Abdera to Zookeeper, if you are looking for a rewarding experience in Open Source and industry leading software, chances are you are going to find it here. Are you powered by Apache?

FEATURED PROJECTS

- Apache Olingo
- Apache Santuario
- Apache Chukwa

APACHE OLINGO

Apache Olingo is a Java library that implements the Open Data Protocol (OData). Apache Olingo serves client and server aspects of OData. It currently supports OData 2.0 and support OData 4.0 (beta). The latter is the OASIS version of the protocol: OASIS Open Data Protocol (OData) TC. The extensions part...

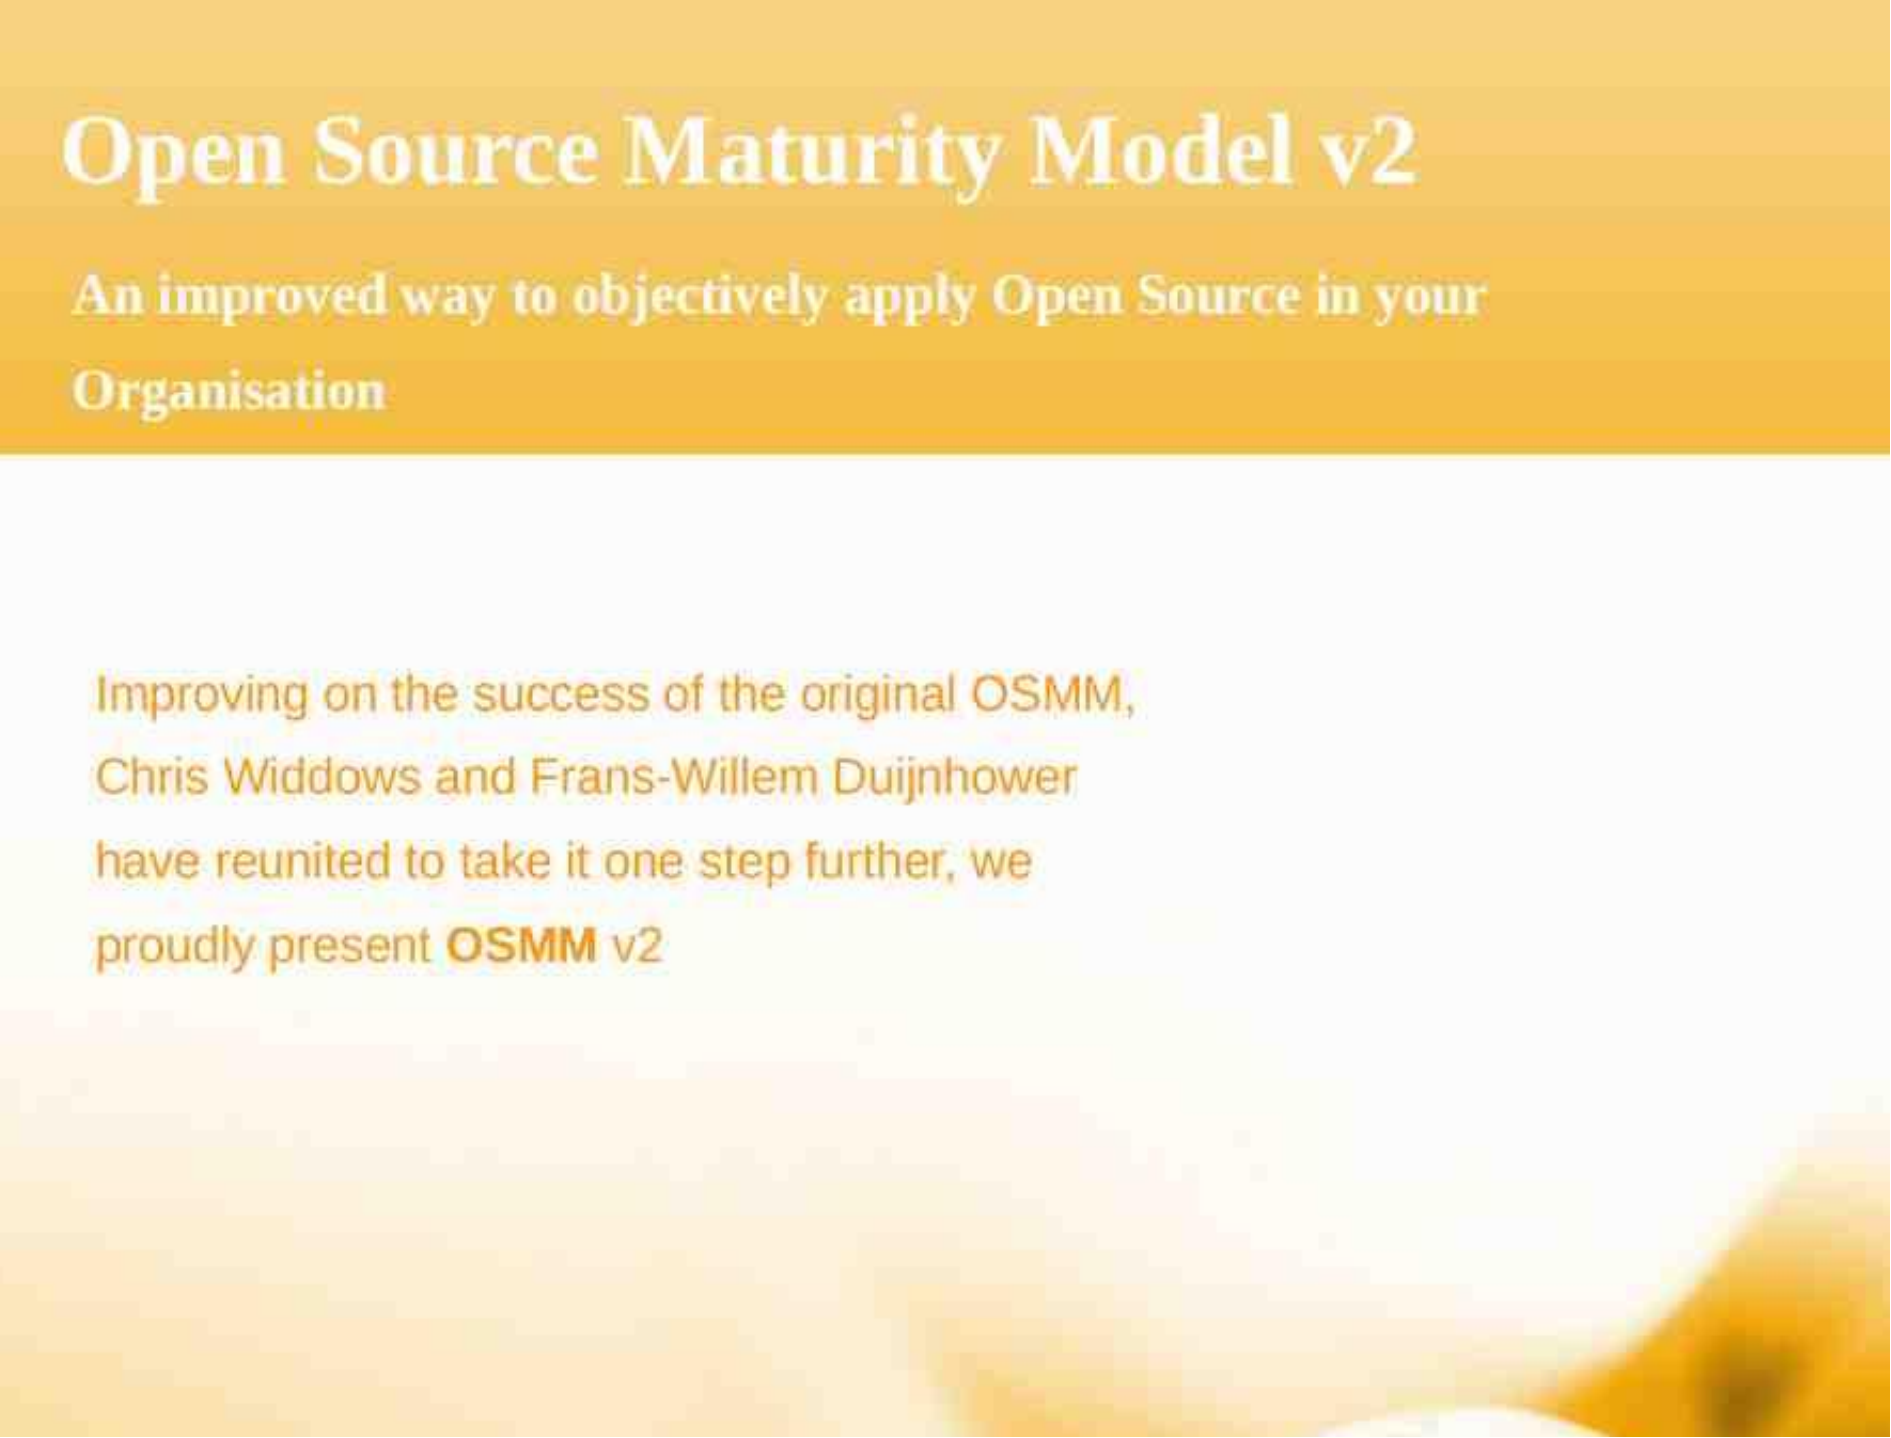
COMMUNITY

Open Source Maturity Model v2

An improved way to objectively apply Open Source in your Organisation

Improving on the success of the original OSMM, Chris Widdows and Frans-Willem Duijnhower have reunited to take it one step further, we proudly present **OSMM** v2



Open Product Selection Process

A documented way to select the product that matches you best

Many claim to offer a predictable way to functionally match the application right for you to you. Why do they then not explain how they do it? The OPSP hides nothing, creating a transparent selection process for all.

Project Summary
The Open Source
Business Process Management suite
Connecting people, systems, and day-to-day work using a BPM Suite has never been easier.
Try its advanced BPMN 2.0 functionality, easy-to-implement connectors, and ultra-scalable Java engine.
Bonita BPM makes the job of building process-driven business applications faster than ever!
